

**GLBET Coastal Habitat Workgroup  
Draft Logic Model  
March 8, 2004**

**Resources:**

- GLBET members stations and associated resources
- Coastal Program
- External Partners

**Activities:**

- strengthen the Service's Coastal Program in the Great Lakes
- coordinate activities within the other GLBET sub-committees (migratory birds, islands, lake sturgeon, GIS/DSS)
- increase and improve coordination with external partner's coastal programs and habitat restoration programs
- increase outreach to Congressional members on coastal issues
- provide education to the public regarding the values of coastal resources
- provide input to the Corps of Engineers on the potential impacts of the Great Lakes Navigation Improvement Project, water level study on Lake Ontario

**Outputs:**

- habitat enhancement, restoration and protection
- improved information sharing between GLBET committees
- stronger ties between the Service, NGO, and State programs
- Congressional outreach materials
- general outreach materials
- increased support for coastal habitat protection, enhancement and restoration
- data layers within the GLBET GIS/DSS addressing coastal resources basin wide

**Short-term outcomes:**

- establish workgroup members
- establish workgroup goals and objectives
- determine leads for objectives

**Mid-term outcomes:**

- improved internal and external communication and coordination on coastal issues
- coordinated priority setting by Service, State and NGO partners
- increased support for coastal issues by Congressional Offices

**Long-term outcomes:**

- a highly effective program throughout the Great Lakes Basin addressing priority coastal issues
